		communications including	
		but not limited to:	
		Ultrasound Image Storage,	
		Modality Worklist, Print,	
		Storage Commitment,	
	Intended use of device in network-connected	Modality Performed	
DOC-6	environment:	Procedure Step	
DOC-7	Document Release Date	October, 2019	
	Coordinated Vulnerability Disclosure: Does the	Yes,	
	manufacturer have a vulnerability disclosure program	https://www.sonosite.com/s	
DOC-8	for this device?	upport/security	_
	ISAO: Is the manufacturer part of an Information		
DOC-9	Sharing and Analysis Organization?	Yes	
	Diagram: Is a network or data flow diagram available		
DOC 10	that indicates connections to other system		
DOC-10	components or expected external resources?	Yes	
DOC 11	SaMD: Is the device Software as a Medical Device (i.e.	No	
DOC-11	software-only, no hardware)?	No	-
DOC-11.1	Does the SaMD contain an operating system?	NA	
	Does the SaMD rely on an owner/operator provided operating system?		
DOC-11.2		NA	
	Is the SaMD hosted by the manufacturer?		
DOC-11.3		NA	
DOC-11.4	Is the SaMD hosted by the customer?	NA	
		Yes, No,	
		N/A, or	
		See Note	Note #
	MANAGEMENT OF PERSONALLY IDENTIFIABLE		
	INFORMATION		
			Along with ultrasound images and clips, the device
	Can this device display, transmit, store, or modify		has the ability to store and transmit the following
	personally identifiable information (e.g. electronic	Yes	ePHI items: Full Patient Name, DOB, Gender, Patient
MPII-1	Protected Health Information (ePHI))?		ID, Accession Number and Indications.
	Does the device maintain personally identifiable		
MPII-2	information?	Yes	
	Does the device maintain personally identifiable		
	information temporarily in volatile memory (i.e., until		
MPII-2.1	cleared by power-off or reset)?	Yes	—
	Does the device store personally identifiable		
MPII-2.2	information persistently on internal media?	Yes	-
	le neverally identified a information of the state		
	Is personally identifiable information preserved in the	Voc	
MPII-2.3	device's non-volatile memory until explicitly erased?	Tes	-
MPII-2.4	Does the device store personally identifiable information in a database?	Yes	
WIF 11-2.4		103	<u> </u>

MPII-2.5	Does the device allow configuration to automatically delete local personally identifiable information after it is stored to a long term solution?	Νο
	Does the device import/export personally identifiable	
	information with other systems (e.g., a wearable	
	monitoring device might export personally	
MPII-2.6	identifiable information to a server)?	Yes
	Does the device maintain personally identifiable	_
	information when powered off, or during power	
MPII-2.7	service interruptions?	Yes
	Does the device allow the internal media to be	_
	removed by a service technician (e.g., for separate	
MPII-2.8	destruction or customer retention)?	Yes
	Does the device allow personally identifiable	
	information records be stored in a separate location	
	from the device's operating system (i.e. secondary	
	internal drive, alternate drive partition, or remote	
MPII-2.9	storage location)?	No
	Does the device have mechanisms used for the	
	transmitting, importing/exporting of personally	
MPII-3	identifiable information?	Yes
	Does the device display personally identifiable	
MPII-3.1	information (e.g., video display, etc.)?	Yes
	Does the device generate hardcopy reports or images	
MPII-3.2	containing personally identifiable information?	Yes
WIF II-5.2	containing personally identifiable information:	
	Does the device retrieve personally identifiable	
	information from or record personally identifiable	
	information to removable media (e.g., removable-	
	HDD, USB memory, DVD-R/RW,CD-R/RW, tape, CF/SD	
MPII-3.3	card, memory stick, etc.)?	Yes
	Does the device transmit/receive or import/export	
	personally identifiable information via dedicated	
	cable connection (e.g., RS-232, RS-423, USB, FireWire,	
MPII-3.4	etc.)?	No
	Does the device transmit/receive personally	
	identifiable information via a wired network	
MPII-3.5	connection (e.g., RJ45, fiber optic, etc.)?	Yes
	Does the device transmit/receive personally	_
	identifiable information via a wireless network	
	connection (e.g., WiFi, Bluetooth, NFC, infrared,	
MPII-3.6	cellular, etc.)?	Yes
	Does the device transmit/receive personally	
	identifiable information over an external network	
MPII-3.7	(e.g., Internet)?	No
	Does the device import personally identifiable	_
MPII-3.8	information via scanning a document?	Yes
	Does the device transmit/receive personally	
MPII-3.9	identifiable information via a proprietary protocol?	No
	Does the device use any other mechanism to	
	transmit, import or export personally identifiable	
MPII-3.10	information?	No
Management of	Private Data notes:	
-		

AUTOMATIC LOGOFF (ALOF)

The device's ability to prevent access and misuse by unauthorized users if device is left idle for a period of time.

ALOF-1	Can the device be configured to force reauthorization of logged-in user(s) after a predetermined length of inactivity (e.g., auto-logoff, session lock, password protected screen saver)?	Yes	Inactivity timer to enter sleep mode configurable to off, 5 minutes or 10 minutes. 2) Inactivity timer to power down configurable to off, 15 minutes or 30 minutes.
ALUF-1	protected screen saver)?	Tes	Inactivity timer to enter sleep mode configurable to
			,
			off, 5 minutes or 10 minutes. 2) Inactivity timer to
	Is the length of inactivity time before auto-		power down configurable to off, 15 minutes or 30
ALOF-2	logoff/screen lock user or administrator configurable?	Yes	minutes.

AUDIT CONTROLS (AUDT)

The ability to reliably audit activity on the device.

	Can the medical device create additional audit logs or	
AUDT-1	reports beyond standard operating system logs?	Yes
AUDT-1.1	Does the audit log record a USER ID?	Yes
	Does other personally identifiable information exist in	
AUDT-1.2	the audit trail?	No
	Are events recorded in an audit log? If yes, indicate	
	which of the following events are recorded in the	
AUDT-2	audit log:	Yes
AUDT-2.1	Successful login/logout attempts?	Yes
AUDT-2.2	Unsuccessful login/logout attempts?	Yes
AUDT-2.3	Modification of user privileges?	Yes
AUDT-2.4	Creation/modification/deletion of users?	Yes
AUDT-2.5	Presentation of clinical or PII data (e.g. display, print)?	No
AUDT-2.6	Creation/modification/deletion of data?	No
	Import/export of data from removable media (e.g.	
AUDT-2.7	USB drive, external hard drive, DVD)?	No
	Receipt/transmission of data or commands over a	—
AUDT-2.8	network or point-to-point connection?	No
AUDT-2.8.1	Remote or on-site support?	NA
	Application Programming Interface (API) and similar	
AUDT-2.8.2	activity?	NA
AUDT-2.9	Emergency access?	NA
AUDT-2.10	Other events (e.g., software updates)?	No
1001 2020		
AUDT-2.11	Is the audit capability documented in more detail?	Yes
	Can the owner/operator define or select which events	_
AUDT-3	are recorded in the audit log?	No
NODI 5	Is a list of data attributes that are captured in the	
AUDT-4	audit log for an event available?	Yes
AUDT-4.1	Does the audit log record date/time?	Yes
A001 4.1		
	Can date and time be synchronized by Network Time	
AUDT-4.1.1	Protocol (NTP) or equivalent time source?	Yes
AUDT-5	Can audit log content be exported?	Yes
AUDT-5.1	Via physical media?	Yes
A0D1-3.1		
	Via IHE Audit Trail and Node Authentication (ATNA)	No
AUDT-5.2	profile to SIEM?	No
AUDT-5.3	Via Other communications (e.g., external service	Νο
AUD1-5.3	device, mobile applications)?	
	Are audit logs encrypted in transit or on storage	Voc
AUDT-5.4	media?	Yes Audit logs are encrypted on the device storage
	Can audit logs be monitored/reviewed by	Y.
AUDT-6	owner/operator?	Yes
AUDT-7	Are audit logs protected from modification?	Yes
AUDT-7.1	Are audit logs protected from access?	Yes
AUDT-8	Can audit logs be analyzed by the device?	Yes

AUTHORIZATION (AUTH)

	The ability of the device to determine the authorization of users.		
	Does the device prevent access to unauthorized users		
	through user login requirements or other		
AUTH-1	mechanism?	Yes	
	Can the device be configured to use federated		
	credentials management of users for authorization		
AUTH-1.1	(e.g., LDAP, OAuth)?	No	_
	Can the customer push group policies to the device		
AUTH-1.2	(e.g., Active Directory)?	No	_
	Are any special groups, organizational units, or group		
AUTH-1.3	policies required?	No	_
	Can users be assigned different privilege levels based		
	on 'role' (e.g., user, administrator, and/or service,		
AUTH-2	etc.)?	Yes	_
	Can the device owner/operator grant themselves		
	unrestricted administrative privileges (e.g., access		
	operating system or application via local root or		
AUTH-3	administrator account)?	No	_
	Does the device authorize or control all API access		
AUTH-4	requests?	NA	_
	Does the device run in a restricted access mode, or		
AUTH-5	'kiosk mode', by default?	Yes	<u> </u>

CYBER SECURITY PRODUCT UPGRADES (CSUP)

	CIDER SECONITI PRODUCT OF GRADES (CSOF)	
	The ability of on-site service staff, remote service	
	staff, or authorized customer staff to install/upgrade	
	device's security patches.	
	Does the device contain any software or firmware	
	which may require security updates during its	
	operational life, either from the device manufacturer	
	or from a third-party manufacturer of the	
	software/firmware? If no, answer "N/A" to questions	
CSUP-1	in this section.	Yes
	Does the device contain an Operating System? If yes,	
CSUP-2	complete 2.1-2.4.	Yes
	Does the device documentation provide instructions	
	for owner/operator installation of patches or	
CSUP-2.1	software updates?	Yes
	Does the device require vendor or vendor-authorized	
CSUP-2.2	service to install patches or software updates?	No
	Does the device have the capability to receive remote	
CSUP-2.3	installation of patches or software updates?	No
	Does the medical device manufacturer allow security	
	updates from any third-party manufacturers (e.g.,	
	Microsoft) to be installed without approval from the	
CSUP-2.4	manufacturer?	No
	Does the device contain Drivers and Firmware? If yes,	
CSUP-3	complete 3.1-3.4.	Yes
	Does the device documentation provide instructions	
	for owner/operator installation of patches or	
CSUP-3.1	software updates?	Yes
	Does the device require vendor or vendor-authorized	
CSUP-3.2	service to install patches or software updates?	No
	Does the device have the capability to receive remote	
CSUP-3.3	installation of patches or software updates?	No

	Does the medical device manufacturer allow security	
	updates from any third-party manufacturers (e.g.,	
	Microsoft) to be installed without approval from the	Na
CSUP-3.4	manufacturer? Does the device contain Anti-Malware Software? If	No
		No
CSUP-4	yes, complete 4.1-4.4.	NO
	Does the device documentation provide instructions	
	for owner/operator installation of patches or	
CSUP-4.1	software updates?	NA
	Does the device require vendor or vendor-authorized	
CSUP-4.2	service to install patches or software updates?	NA
	Does the device have the capability to receive remote	
CSUP-4.3	installation of patches or software updates?	NA
	Does the medical device manufacturer allow security	
	updates from any third-party manufacturers (e.g.,	
	Microsoft) to be installed without approval from the	
CSUP-4.4	manufacturer?	NA
	Does the device contain Non-Operating System	
	commercial off-the-shelf components? If yes,	
CSUP-5	complete 5.1-5.4.	No
	Does the device documentation provide instructions	
	for owner/operator installation of patches or	
CSUP-5.1	software updates?	NA
	Does the device require vendor or vendor-authorized	
CSUP-5.2	service to install patches or software updates?	NA
	Does the device have the capability to receive remote	
CSUP-5.3	installation of patches or software updates?	NA
	Does the medical device manufacturer allow security	
	updates from any third-party manufacturers (e.g.,	
	Microsoft) to be installed without approval from the	
CSUP-5.4	manufacturer?	NA
	Does the device contain other software components	
	(e.g., asset management software, license	
	management)? If yes, please provide details or	
CSUP-6	refernce in notes and complete 6.1-6.4.	No
	Does the device documentation provide instructions	
	for owner/operator installation of patches or	
CSUP-6.1	software updates?	NA
	Does the device require vendor or vendor-authorized	
CSUP-6.2	service to install patches or software updates?	NA
	Does the device have the capability to receive remote	
CSUP-6.3	installation of patches or software updates?	NA
	Does the medical device manufacturer allow security	
	updates from any third-party manufacturers (e.g.,	
	Microsoft) to be installed without approval from the	
CSUP-6.4	manufacturer?	NA
0.4	Does the manufacturer notify the customer when	
CSUP-7	updates are approved for installation?	Yes
CJUT-7	Does the device perform automatic installation of	res
CSUP-8	software updates?	No
CJUT-0	sortware apaates:	NU
	Does the manufacturar have an approved list of third	
	Does the manufacturer have an approved list of third-	
CSUP-9	party software that can be installed on the device?	NA
	Can the owner/operator install manufacturer-	
	approved third-party software on the device themselves?	V
		Yes
CSUP-10		
CSUP-10 CSUP-10.1	Does the system have mechanism in place to prevent installation of unapproved software?	Yes

	Does the manufacturer have a process in place to	
CSUP-11	assess device vulnerabilities and updates?	Yes
	Does the manufacturer provide customers with	
CSUP-11.1	review and approval status of updates?	Yes
CSUP-11.2	Is there an update review cycle for the device?	Yes

HEALTH DATA DE-IDENTIFICATION (DIDT)

The ability of the device to directly remove information that allows identification of a person.

	Does the device provide an integral capability to de-	
DIDT-1	identify personally identifiable information?	Yes
	Does the device support de-identification profiles that	
	comply with the DICOM standard for de-	
DIDT-1.1	identification?	Yes

The device can be configured to mask PHI on the display screen. The device has a feature to anonymize patient data prior to USB export.

DATA BACKUP AND DISASTER RECOVERY (DTBK)

The ability to recover after damage or destruction of device data, hardware, software, or site configuration information. Does the device maintain long term primary storage of personally identifiable information / patient information (e.g. PACS)? Does the device have a "factory reset" function to restore the original device settings as provided by the manufacturer? Does the device have an integral data backup capability to removable media? Does the device have an integral data backup capability to remote storage?

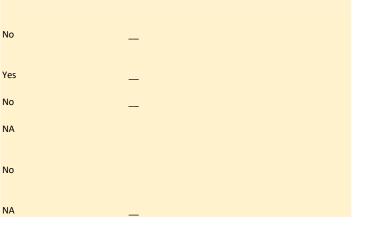

Does the device have a backup capability for system configuration information, patch restoration, and DTBK-5 software restoration? Does the device provide the capability to check the DTBK-6 integrity and authenticity of a backup?

EMERGENCY ACCESS (EMRG)

The ability of the device user to access personally identifiable information in case of a medical emergency situation that requires immediate access to stored personally identifiable information. Does the device incorporate an emergency access (i.e. "break-glass") feature?

HEALTH DATA INTEGRITY AND AUTHENTICITY (IGAU)

How the device ensures that the stored data on the device has not been altered or destroyed in a nonauthorized manner and is from the originator. Does the device provide data integrity checking mechanisms of stored health data (e.g., hash or digital signature)?

No ____

EMRG-1

DTBK-1

DTBK-2

DTBK-3

DTBK-4

IGAU-2 No.		Does the device provide error/failure protection and recovery mechanisms for stored health data (e.g.,

recipient must be identified

NAUT-1

Web APIs, SMTP, SNMP)?

	Are network access control mechanisms supported	
NAUT-2	(E.g., does the device have an internal firewall, or use a network connection white list)?	Yes Connections limited to pre defined DICOM server.
NAUT 2	Is the firewall ruleset documented and available for	
NAUT-2.1	review?	NA
	Does the device use certificate-based network	
NAUT-3	connection authentication?	No
	CONNECTIVITY CAPABILITIES (CONN)	
	All network and removable media connections must	
	be considered in determining appropriate security	
	controls. This section lists connectivity capabilities that may be present on the device.	
	Does the device have hardware connectivity	
CONN-1	capabilities?	Yes
CONN-1.1	Does the device support wireless connections?	Yes
CONN-1.1.1	Does the device support Wi-Fi?	Yes
CONN-1.1.2	Does the device support Bluetooth?	No
		_
	Does the device support other wireless network	
CONN-1.1.3	connectivity (e.g. LTE, Zigbee, proprietary)?	No
	Does the device support other wireless connections	
CONN-1.1.4	(e.g., custom RF controls, wireless detectors)?	No
CONN-1.2	Does the device support physical connections?	Yes
CONN-1.2.1	Doos the device have available PIAS Ethernet parts?	Voc
CONN-1.2.1 CONN-1.2.2	Does the device have available RJ45 Ethernet ports? Does the device have available USB ports?	Yes Yes
CONN-1.2.2	Does the device require, use, or support removable	
CONN-1.2.3	memory devices?	Yes
		_
CONN-1.2.4	Does the device support other physical connectivity?	No
	Does the manufacturer provide a list of network ports	
	and protocols that are used or may be used on the	
CONN-2	device?	Yes
	Can the device communicate with other systems	
CONN-3	within the customer environment?	Yes
	Can the device communicate with other systems	
CONN-4	external to the customer environment (e.g., a service host)?	No
CONN-5	Does the device make or receive API calls?	Yes
001110	Does the device require an internet connection for its	
CONN-6	intended use?	No
	Does the device support Transport Layer Security	
CONN-7	(TLS)?	Yes
CONN-7.1	Is TLS configurable?	No
	Does the device provide operator control	
	functionality from a separate device (e.g.,	
CONN-8	telemedicine)?	No
	PERSON AUTHENTICATION (PAUT)	
	The ability to configure the device to authenticate	

	users.		
	Does the device support and enforce unique IDs and		
	passwords for all users and roles (including service		
PAUT-1	accounts)?	Yes	
	Does the device enforce authentication of unique IDs		
	and passwords for all users and roles (including		
PAUT-1.1	service accounts)?	Yes	_

	Is the device configurable to authenticate users		
PAUT-2	through an external authentication service (e.g., MS Active Directory, NDS, LDAP, OAuth, etc.)?	No	
	Is the device configurable to lock out a user after a		
PAUT-3	certain number of unsuccessful logon attempts?	No	_
	Are all default accounts (e.g., technician service		
	accounts, administrator accounts) listed in the		
PAUT-4	documentation?	Yes	_
PAUT-5	Can all passwords be changed?	Yes	
	Is the device configurable to enforce creation of user account passwords that meet established		
PAUT-6	(organization specific) complexity rules?	No	
PAUI-0	Does the device support account passwords that	NO	
PAUT-7	expire periodically?	No	
	expire periodically:		-
PAUT-8	Does the device support multi-factor authentication?	No	_
PAUT-9	Does the device support single sign-on (SSO)?	No	
PAUT-10	Can user accounts be disabled/locked on the device?	Yes	
PAUT-11	Does the device support biometric controls?	No	
	Does the device support physical tokens (e.g. badge		
PAUT-12	access)?	No	
	Does the device support group authentication (e.g.		
PAUT-13	hospital teams)?	Yes	
	Does the application or device store or manage		
PAUT-14	authentication credentials?	Yes	-
PAUT-14.1	Are credentials stored using a secure method?	Yes	

PHYSICAL LOCKS (PLOK)

	Physical locks can prevent unauthorized users with physical access to the device from compromising the integrity and confidentiality of personally identifiable information stored on the device or on removable media	
	Is the device software only? If yes, answer "N/A" to	
PLOK-1	remaining questions in this section.	No
	Are all device components maintaining personally	
	identifiable information (other than removable	
	media) physically secure (i.e., cannot remove without	
PLOK-2	tools)?	Yes
	Are all device components maintaining personally	
	identifiable information (other than removable	
	media) physically secured behind an individually	
PLOK-3	keyed locking device?	Yes
	Does the device have an option for the customer to	
	attach a physical lock to restrict access to removable	
PLOK-4	media?	NA

ROADMAP FOR THIRD PARTY COMPONENTS IN DEVICE LIFE CYCLE (RDMP)

	Manufacturer's plans for security support of third-			
	party components within the device's life cycle.			
	Was a secure software development process, such as			
	ISO/IEC 27034 or IEC 62304, followed during product			
RDMP-1	development?	Yes		

Media is None removable

RDMP-2	the device for secure development practices?	Yes	_
	Does the manufacturer maintain a web page or other		
	source of information on software support dates and		
RDMP-3	updates?	Yes	
	Does the manufacturer have a plan for managing		— https://www.sonosite.com/support/sonosite-
		¥	
RDMP-4	third-party component end-of-life?	Yes	product-retirement-schedule
	SOFTWARE BILL OF MATERIALS (SBoM)		
	A Software Bill of Material (SBoM) lists all the		
	software components that are incorporated into the		
	device being described for the purpose of operational		
	security planning by the healthcare delivery		
	organization. This section supports controls in the		
	RDMP section.		
SBOM-1	Is the SBoM for this product available?	Yes	_
	Does the SBoM follow a standard or common method		
SBOM-2	in describing software components?	Yes	
SBOM-2.1	Are the software components identified?	Yes	
	Are the developers/manufacturers of the software		
SBOM-2.2	components identified?	Yes	
	Are the major version numbers of the software		-
SBOM-2.3	components identified?	Yes	
300101-2.5	components identified:	163	
SBOM-2.4	Are any additional descriptive elements identified?	Yes	
3DUIVI-2.4		165	—
	Does the device include a command or process		
	method available to generate a list of software		
SBOM-3	components installed on the device?	Yes	
SBOM-4	Is there an update process for the SBoM?	Yes	
	SYSTEM AND APPLICATION HARDENING (SAHD)		
	The device's inherent resistance to cyber attacks and		
	malware.		
	Is the device hardened in accordance with any		
SAHD-1	industry standards?	Yes	
	Has the device received any cybersecurity		This device has been tested by 3rd Party Cyber
SAHD-2	certifications?	Yes	Security tested organization
0,110 2	Does the device employ any mechanisms for software		System and Integerity checking is performed during
SAHD-3	integrity checking	Yes	boot up
SAILD-S	Does the device employ any mechanism (e.g., release-		boot up
	specific hash key, checksums, digital signature, etc.)		
CALLE 2 4	to ensure the installed software is manufacturer-	N .	System and Integerity checking is performed during
SAHD-3.1	authorized?	Yes	boot up
	Does the device employ any mechanism (e.g., release-		
	specific hash key, checksums, digital signature, etc.)		
	to ensure the software updates are the manufacturer-		System and Integerity checking is performed during
SAHD-3.2	authorized updates?	Yes	boot up
	Can the owner/operator perform software integrity		
	checks (i.e., verify that the system has not been		
SAHD-4	modified or tampered with)?	No	
	Is the system configurable to allow the		
	implementation of file-level, patient level, or other		
SAHD-5	types of access controls?	Yes	
			_
SAHD-5.1	Does the device provide role-based access controls?	Yes	
	•		
	Are any system or user accounts restricted or disabled		
SAHD-6	by the manufacturer at system delivery?	Yes	
			<u> </u>
SAHD-6 1		Yes	
5, 112 0.1			_
SAHD-6.1	Are any system or user accounts configurable by the end user after initial configuration?	Yes	

Yes

Does the manufacturer evaluate third-party applications and software components included in

the device for secure development practices?

RDMP-2

	Does this include restricting certain system or user		
	accounts, such as service technicians, to least		
SAHD-6.2	privileged access?	Yes	
	Are all shared resources (e.g., file shares) which are		
	not required for the intended use of the device		
SAHD-7	disabled?	Yes	
	Are all communication ports and protocols that are		
	not required for the intended use of the device		
SAHD-8	disabled?	Yes	
	Are all services (e.g., telnet, file transfer protocol		
	[FTP], internet information server [IIS], etc.), which		
	are not required for the intended use of the device		
SAHD-9	deleted/disabled?	Yes	
	Are all applications (COTS applications as well as OS-		
	included applications, e.g., MS Internet Explorer, etc.)		
	which are not required for the intended use of the		
SAHD-10	device deleted/disabled?	Yes	
	Can the device prohibit boot from uncontrolled or		
	removable media (i.e., a source other than an internal		
SAHD-11	drive or memory component)?	Yes	
	Can unauthorized software or hardware be installed		
SAHD-12	on the device without the use of physical tools?	No	
CALLE 42	Does the product documentation include information		
SAHD-13	on operational network security scanning by users?	No	
	Can the device be hardened beyond the default	Ne	
SAHD-14	provided state?	No	
	Are instructions available from vendor for increased	NA	
SAHD-14.1	hardening?	NA	
SHAD-15	Can the system prevent access to BIOS or other	Vec	
3HAD-15	bootloaders during boot?	Yes	
	Have additional hardening methods not included in		
SAHD-16	2.3.19 been used to harden the device?	Yes	
SAID IU			
	SECURITY GUIDANCE (SGUD)		
	Availability of security guidance for operator and		
	administrator of the device and manufacturer sales		
	and service.		
	Does the device include security documentation for		
SGUD-1	the owner/operator?	Yes	
5666 1	Does the device have the capability, and provide		
	instructions, for the permanent deletion of data from		
SGUD-2	the device or media?	Yes	
3000 2			
SGUD-3	Are all access accounts documented?	Yes	
3000 3	Can the owner/operator manage password control		
SGUD-3.1	for all accounts?	Yes	
5555 5.1	.e. un decounts.	_	
	Does the product include documentation on		
SGUD-4	recommended compensating controls for the device?	Yes	
	HEALTH DATA STORAGE CONFIDENTIALITY		
	(STCF)		
	The ability of the device to ensure unauthorized		
	access does not compromise the integrity and		

 access does not compromise the integrity and confidentiality of personally identifiable information stored on the device or removable media.

 STCF-1
 Can the device encrypt data at rest?
 Yes

 STCF-1.1
 Is all data encrypted or otherwise protected?
 Yes

STCF-1.2	Is the data encryption capability configured by default?	Yes	
STCF-1.3	Are instructions available to the customer to configure encryption?	NA	Device is already configured
5161 1.5			
STCF-2	Can the encryption keys be changed or configured?	No	_
	Is the data stored in a database located on the		
STCF-3	device?	Yes	_
	Is the data stored in a database external to the		
STCF-4	device?	Yes	_

TRANSMISSION CONFIDENTIALITY (TXCF)

	The ability of the device to ensure the confidentiality of transmitted personally identifiable information.		
TXCF-1	Can personally identifiable information be transmitted only via a point-to-point dedicated cable?	Νο	_
TXCF-2	Is personally identifiable information encrypted prior to transmission via a network or removable media?	Yes	
TXCF-2.1	If data is not encrypted by default, can the customer configure encryption options?	Yes	_
	Is personally identifiable information transmission		
TXCF-3	restricted to a fixed list of network destinations?	Yes	_
TXCF-4	Are connections limited to authenticated systems?	Yes	
TXCF-5	Are secure transmission methods supported/implemented (DICOM, HL7, IEEE 11073)?	Yes	_

TRANSMISSION INTEGRITY (TXIG)

	The ability of the device to ensure the integrity of transmitted data.		
			Customers can order an optional FIPS 140-2
	Does the device support any mechanism (e.g., digital		validated WiFi module to ensure data confidentiality
	signatures) intended to ensure data is not modified		between the system and
TXIG-1	during transmission?	Yes	their access point.
	Does the device include multiple sub-components		
TXIG-2	connected by external cables?	No	

	REMOTE SERVICE (RMOT)	
	Remote service refers to all kinds of device maintenance activities performed by a service person via network or other remote connection.	
RMOT-1	Does the device permit remote service connections for device analysis or repair?	The device does not have any remote service capability. All servicing requires physical access to No the device
RMOT-1.1	Does the device allow the owner/operator to initiative remote service sessions for device analysis or repair?	ΝΑ
RMOT-1.2	Is there an indicator for an enabled and active remote session?	NA
RMOT-1.3	Can patient data be accessed or viewed from the device during the remote session?	NA
RMOT-2	Does the device permit or use remote service connections for predictive maintenance data?	NA
RMOT-3	Does the device have any other remotely accessible functionality (e.g. software updates, remote training)?	No

OTHER SECURITY CONSIDERATIONS (OTHR)

Notes:

Example note. Please keep individual notes to one cell. Please use separate notes for separate information

Note 1
