

## **SONOSITE** PX

## **Quick** Reference Guide

## Turning on the system

Press the power button located at the back of the system

### Starting a study

#### **New patient**

- 1 Tap Enter Patient Information from the startup screen or + New Patient from the touch panel.
- 2 Enter patient information.
- 3 Tap Scan to start imaging.

All data saved during the study are linked to the patient.

#### Exam types

- 1 Select the transducer and exam button.
- 2 Select a transducer and exam type.
- 3 Double-tap on the exam type or tap Scan to start imaging.

### Scanning

- 2D is the default mode. Press 2D to return to the default mode.
- Press M to scan in M Mode.
- Press C to scan in color Doppler.
- Press D to scan in Doppler.

#### M Mode

- 1 Use the touchpad to position the M-line in the 2D image.
- 2 To display both the M-line and trace, press UPDATE/ () or press M again.
- 3 Press the UPDATE/ () button to toggle between the image and the trace.

#### **Color Doppler**

- 1 Use the Color Type control to switch between Color Velocity (CVD) and Color Power (CPD), or CVD and Color Variance (Var), depending on the exam type. You may need to tap + More Controls on the touch panel to find the control.
- 2 Position the color box by dragging your finger on the touchpad.
- 3 Press SELECT/ 😿 to control the size of the color box, then resize by dragging your finger on the touchpad.

#### Doppler

- 1 Use the Doppler Mode control to switch between PW, CW, and TDI Doppler imaging (CW and TDI are available only in the cardiac exam). You may need to tap + More Controls to find the control.
- 2 Use the touchpad to position the D-line and gate in the 2D image.
- 3 To display the spectral trace, press UPDATE/ () or press D again.
- 4 Press the UPDATE/ () button to toggle control between the image and the trace.

6 Labels, Calcs, Calipers

# SONOSITE PX

## Quick Reference Guide
