

The standard in durable, reliable ultrasound

Durable and reliable is what Sonosite is known for, and each ultrasound system we make comes with a comprehensive warranty.*

Our systems and proprietary transducers are built tough: able to withstand a 3-foot or 1 meter drop, resist fluid contamination, and work in harsh conditions without pause.

With that kind of performance, it's no wonder that we've installed more than 145,000 ultrasound systems worldwide.

In the unlikely event that your Sonosite system does need repair, our overnight loaner program minimizes costly downtime.
