

## Peripherally Inserted Central Catheter PICC Train the Trainer for Ultrasound!

*PICC Excellence, Inc.*

**A comprehensive ON-SITE TWO-DAY educational program for ultrasound placement of peripherally inserted central catheters (PICCs) for 1-2 persons maximum.**

**Training Description:** Training is focused on providing PICC qualification and competency with ultrasound guided insertion for one main person

and the second as time and insertion opportunities allow. Competency is established by completing didactic, hands-on practice and 4-6 patient successful insertions with the instructor.

Didactic training material (DVD and workbook) is provided in advance, completion required prior to instructor arrival. The training is completed in a Train the Trainer format, providing criteria for qualification of the PICC competent participant to advance to instructor level and continue insertion training with others. Educational materials

and services include: DVD or online access for Basic Modified Seldinger PICC Training and Inserting PICCs with Ultrasound, workbook and on-site expert PICC instructor for 2 days.

**Please contact your local SonoSite sales consultant for additional information.**

*Continuing education Certificate of Qualification  
(11.5 hours) provided at conclusion of training!*
